

- Enter the schools Virtual Competition Score on your SGO area tab by following the link we will provide (when leaderboards are requested).

There will be a different link and leaderboard for each age group competition.

Enter School/Class and Virtual Competition Score here.

Area tab is Ashford. There will be a tab for each SGO area within your County Leaderboard.

School/Class	Points
Furley Park	1717

- By entering results, the Standings Tab will automatically update with a ranking County Leaderboard. The results will also automatically update the National Leaderboard.

Additional (Optional Resource):

If you only intend to request the Virtual Competition Score to be returned from each School (rather than the completed spreadsheet to be emailed back to you) you can request an SGO area specific Google Form from adam@sportshall.org.

To view your responses click here and create a Google Sheet for the responses.

You can either email the form to your Schools or embed it on your website.

These are the questions that will be sent to your Schools to fill in.

Category Data:

A number of Counties asked us to provide a function for the recording of category data for YST collection purposes. Those areas that don't intend to collect this data can ignore the following section.

1. If you are intending to collect Category data the first thing you should do is click the + button at the top left hand side of the Input page:

2. There are three columns for category data. Each column has more information if you hover over the column header or red triangle. Each County is welcome to use one, all or none of the category data columns as suits.

Column 1 Student from a BAME background? Please click YES from the dropdown or leave blank.

Column 2 Disability This will be a number between 1 and 4 or left blank.

I appreciate that this may be more effort for users to equate the Disability to one of Athletics Disability Groups (the groupings can be found on the Guide page of the spreadsheet) but it will enable us to run Disability Competitions both Virtual and Face to Face in the future.

The results for all athletes will be used to create the Virtual Competition Score.

At present all athletes will use the same points and awards tables but in due course (following return of data) we will create Disability Group and adaptation specific points and awards tables.

At present Vertical Jump and Standing Long Jump are shaded out for Groups 1 and 2 (Electric and Manual Wheelchairs) as the scores the adaptations create don't easily equate. We would suggest that all the athletes either complete the events with adaptations or local alternatives are provided but that Standing Long Jump and Vertical Jump results for Groups 1 and 2 are not entered.

We appreciate that this is not ideal but intend for the second iteration of the file to be far more comprehensive.

Column 3 This has been left blank so that each County can specify an additional layer of category data specific to them.

3. Once you have entered your own column 3 header we would suggest saving the file (with the 3 additional columns open) before sending to schools.
4. If you are collecting category data we would advise asking schools to remove the students names from the input tab and save a copy of the spreadsheet before emailing it to you.

To enable Fitness Monitoring/data analysis (a Secondary optional benefit):

As well as facilitating Personal Best Challenges and Local, County and National Team Competition the School Games Pentathlon can recover lots of data that can be useful for Schools and Counties to draw comparisons about relative activity and performance levels.

Schoolwide 'Our Y4s are outperforming last years Y4s', 'Our Girls are outperforming the Boys on Speed Bounce'.

Countywide 'The chart shows average points in Dartford are higher than in Medway at all ages – why?'

Nationwide 'Average points in the South West for Y7 students are higher than in the South East – why?'

At the end of the academic year we will put together a comprehensive National report collating all returned data.

To help facilitate this please follow the steps below:

1. When schools return their spreadsheets to you please copy Columns B to J from their export tab. If you are collecting category data please use the + sign to open up and also copy columns K to M.

PLEASE COPY CELLS B4 TO J43 (AND K4 TO M43 IF COLLECTING CATEGORY DATA) AND PASTE VALUES INTO YOUR SGO DATABASE TO COLLATE RESULTS

School	County	Year Group	Boy or Girl	St. Long Jump	Speed Bounce	Chest Push	Vertical Jump	Shuttle Run (10 x 10m)
--------	--------	------------	-------------	---------------	--------------	------------	---------------	------------------------

Category data will open up here.

The purpose of this sheet is to enable anonymised data to be sent back to team@sportshall.org for all results to be included in our National database. SGOs or Active Partnerships can either collate all the anonymised data from across their area and send back as one using our SGO database sheet or can send us each individual results file. The more data we receive from across the Country, the more helpful the data becomes in identifying trends.

2. Please then paste these columns directly into the SGO Hub spreadsheet.
3. After you have closed your competition window please forward your completed SGO Hub with all the results collated back to adam@sportshall.org for inclusion in the National Report.
